Dr. Scott Masten NIEHS Office of Chemical
Nominations and Selection
P. O. Box 1233, MD A3-07
Research Triangle Park, NC 27709

Dear Dr. Masten:

I only just received word that you have recommended toxicological studies for the fluoridating agents **Hexafluorosilicic acid and Sodium hexafluoro-silicate**. In view of the fact that a majority of the nation's water supplies are receiving infusions of these chemicals every day and have been for years, I applaud your recommendation.

Thank you for suggesting these studies. I hope they happen.

Sincerely,

Deborah E. Moore, Ph.D.
